WHAT IS THE ERDKINDER / BOARDING OF MONTESSORI BRITISH?

Our Boarding is much more than a residence:

It is a small, close and flexible community designed for teenagers to live together, study, grow and enjoy themselves while continuing their online education without interruption.

It is designed for students aged 13 to 18, and offers a fully adaptable model:

- Students who stay at the boarding house all week.
- Students who come only a few nights per week.
- Students who attend sporadically or intermittently depending on family or personal needs.

A DIFFERENT BOARDING EXPERIENCE

01

Life

Every day filled with activity, movement and real experiences.

02

Autonomy

They learn to organise themselves, make decisions and take care of themselves independently.

03

Community

They live in a warm environment where everyone matters.

A setting that invites them to explore, discover, move and enjoy, so that every day has meaning beyond the classroom.

FULLY INTEGRATED WITH ONLINE CLASSES

The Erdkinder is coordinated down to the millimetre with the online programme.
This means no student misses class because they are at the boarding house.

- Connections take place from quiet, prepared spaces.
- The staff supervises punctuality and ensures they have everything they need.
- If a student needs additional support, they receive it.
- If a student wants to advance further, they also receive guidance.

The goal is clear:
That the boarding experience gives them life, autonomy and community...
without slowing their academic progress.

At Montessori British we adapt each student's timetable and subjects to their individual needs and goals, always ensuring that they will complete their qualification successfully.

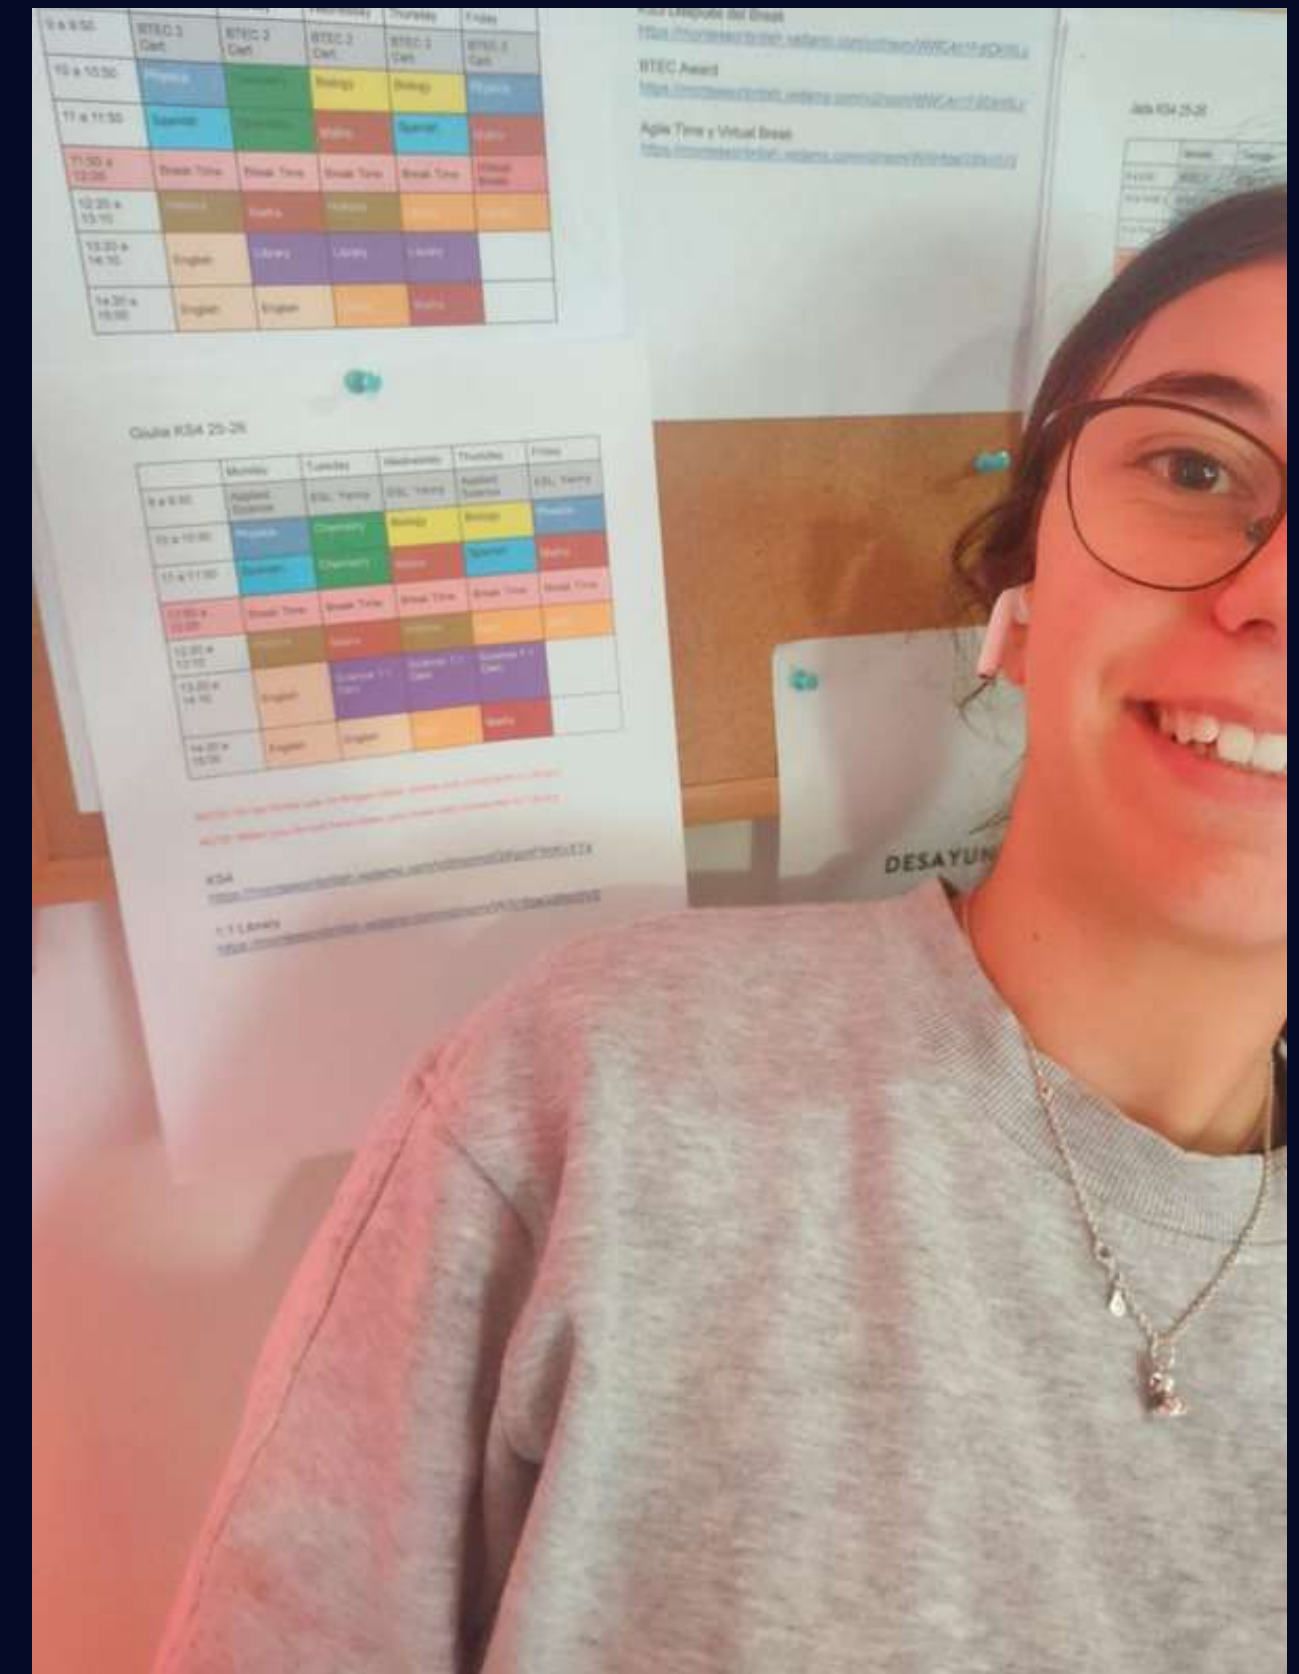

Timetables are not group-based, but fully personalised:

Each student may have a different schedule, combining group classes, 1:1 sessions, or very small groups of two or three students, depending on what they need at each moment.

Our method allows us to advance first in the subjects where the student shows greater strengths, freeing time to dedicate more hours to subjects that are more challenging or to develop their personal vocation.

There is genuine freedom to allocate time to each subject across the week and throughout the entire cycle, so that the academic journey truly adjusts to each adolescent.

ABSOLUTE RESPECT

We believe our main goal is to build a community based on mutual respect among all residents.

Zero tolerance for bullying.

Zero hurtful comments.

Zero harmful attitudes.
